What is claimed is:

5

10

15

1. An interlabial pad comprising:

the seam part by an adhesive agent.

an absorbent body for absorbing liquid; and

a cover body covering the absorbent body in an enclosing manner and comprising a surface side sheet having a permeable property for liquid and a back face side sheet having an impermeable property agaist liquid;

the interlabial pad being fitted between labia with the surface side sheet set at a body side;

wherein the cover body is provided with a continuous or discontinuous parting zone that is parted by actions of water, along which the cover body is separated into a plurality of small sheet pieces when water acts.

- 2. The interlabial pad according to Claim 1; wherein the parting zone is provided in the back face side sheet.
- 3. The interlabial pad according to Claim 1 or 2; wherein the parting zone is a seam part formed by overlapping the plurality of small sheet pieces one another.
 - 4. The interlabial pad according to Claim 3; wherein the plurality of small sheet pieces are adhered together at
- 5. The interlabial pad according to Claim 3 or 4; wherein the seam part is a longitudinal seam part extending in a longitudinal direction of the interlabial pad; and
- a sheet piece which overlaps the other sheet piece at the longitudinal seam part and covers a side closer to a longitudinal central

20

line of the interlabial pad is positioned at an absorbent body side.

The interlabial pad according to Claim 3 or 4; 6.

wherein the seam part is a lateral seam part extending in a lateral direction of the interlabial pad; and

a sheet piece which overlaps the other sheet piece at the lateral seam part and covers a side that becomes a dorsal side when the interlabial pad is fitted between labia is positioned at the absorbent body side.

The interlabial pad according to any one of Claims 3 to 5; 7.

10

5

wherein the seam parts contain a longitudinal seam part extending in the longitudinal direction of the interlabial pad and a lateral seam part extending in the lateral direction of the interlabial pad; and

a sheet piece which overlaps the other sheet piece at the longitudinal seam part and covers a side closer to a longitudinal central line of the interlabial pad is positioned at the absorbent body side; and

a sheet piece which overlaps the other sheet piece at the lateral seam part and covers a side that becomes a dorsal side when the interlabial pad is fitted between labia is positioned at the absorbent body side.

20

25

15

- 8. The interlabial pad according to any one of Claims 1 to 7; wherein the back face side sheet is equipped with a mini-sheet piece on a surface at a side opposite to the absorbent body side.
- 9. The interlabial pad according to any one of claims 2 to 8; wherein the back face side sheet is made uneven at least at the surface opposite to the absorbent body side.
- 10. A packaging body for individual package of interlabial pad, comprising:

a packaging sheet; and

5

10

an interlabial pad covered by the packaging sheet;

wherein the packaging sheet is provided with a continuous or discontinuous parting zone that is parted by actions of water, along which the packaging sheet is separated into a plurality of small sheet pieces when water acts.

11. The packaging body for individual package of interlabial pad according to Claim 10;

wherein the packaging sheet is a liquid impermeable sheet with an impermeable property against liquid.
